- Life Sciences (biology)
- Space science (astronomy)

Scientific Skills

- Scientific Method
- Using science tools
- Science vocabulary
- Collaborative problem solving
- Critical thinking
- Organization
- Study skills

Expectations

There is an expectation that students will be independent and proactive! With appropriate support, students are expected to take responsibility for their needs in order to participate fully in class, which includes: being on time, getting focused, bringing necessary materials, asking questions, following directions, treating others with care and respect, promoting a positive learning environment, and being ready to interact with the fascinating world around us!
