

Name: _____ Class: _____

Atoms Review

1. Label the parts of an atom in the diagram below

- a) What type of charge does a proton have? _____
- b) What type of charge does a neutron have? _____
- c) What type of charge does an electron have? _____
- d) Which two subatomic particles are located in the nucleus of an atom? _____

2. An element is represented by its chemical symbol along with a few numbers. Based on the example on the right, fill in the numbers of protons (P), neutrons (N), and electrons (E) for the following elements.

8	← Atomic Number
O	← Symbol
Oxygen	← Name
15.999	← Average atomic mass

6	#P _____
C	#N _____
Carbon	#E _____
12.011	

10	#P _____
Ne	#N _____
Neon	#E _____
20.108	

19	#P _____
K	#N _____
Potassium	#E _____
39.098	

3. Complete the table using your knowledge of the periodic table.

Symbol	Atomic Number	Mass Number	Number of Protons	Number of Electrons	Number of Neutrons
Na			11		12
K		39		19	
			38		50
F				9	10
	20	40		20	
	50			50	69
I	53	127			

4. On the back of this page, draw a Bohr model for each atom on this chart with an atomic number of 20 or less (4 Bohr models in total).
