

Name: _____

Class: _____

Force and Motion Book Extended Response

1.) Name something that moves. My chosen subject: _____

2.) Describe its motion in the table below:

Speed	Direction	Pattern
How fast does it or can it move?	Where does it usually come from and where does it usually go?	If you watched for a long time, what patterns would you see?
_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____

3.) What is the **force** that causes your chosen subject to move? Be as specific as possible about the force. Is it a push or pull? What is pushing and what is pulling?

4.) What is the **source of energy** that provides the force in question 3? In what form does the energy start, and what kind of energy is produced when your chosen subject moves?

Energy source: _____

Energy Transformation: _____
