

Life Science: Cells
Choose Your Own Vocabulary Practice

Directions:

- Choose 15 words to define and make a vocabulary card for each.
- Start with section 1 and add all the words you want to practice, then add words from the next section.
- You must know all the words from sections 1 and 2. Sections 3 and 4 are bonus words.

Section 1	Section 2	Section 3	Section 4
cell membrane mitochondrion vacuole endoplasmic reticulum ribosome lysosome Golgi apparatus nucleus cell wall chloroplast	cell tissue organ cytoplasm cytosol protein amino acid nucleolus flagellum cilium	organism comprised eukaryotic prokaryotic DNA RNA trait genome ATP cellular respiration	lipid cytoskeleton vesicle centrosome mitosis microtubule chromatin chromosome necrosis biochemistry
